

Hyla3D™ FACE SERUM AND Hyla3D™ FACE CREAM

Hyaluronic Acid Complex

Patented Hyla3D™ technology designed in a serum AND a cream
to optimize hyaluronic acid benefits for every skin type!

BARRIER CONTROL

Advanced barrier function support technologies help to restore skin's hydration, ability to retain moisture, and boost youthful volume!

WEIGHTLESS SERUM

Additional skin and HA boosting technologies to help revitalize and restore the skin's hydration, and youthful volume!

**2 CUSTOMIZED FORMULATIONS DESIGNED
WITH YOUR SKIN IN MIND!**

ADVANCED FORMULATION TO **BOOST HYALURONIC ACID**

PATENTED HYLA3D™ TECHNOLOGIES:

LIPOSOMAL ENCAPSULATED HA

Enhances penetration of large molecular weight HA deep into the skin to hydrate and soothe

CROSS-LINKED HA

A time-release, cross-linked HA with 50X more water binding capacity and 5X more water retention after 24 hours for consistent, long-term hydration

ULTRA-LOW MOLECULAR WEIGHT HA

Extremely small particle size for deep penetration to hydrate and soothe the skin

TRADITIONAL HA

Superior water retention and immediate hydration of the surface of the skin

OLIGOPEPTIDE-24 (HA PEPTIDE)

A peptide shown to increase fibroblast activity, increase synthesis of HA and elastin, reduce inflammation and decrease UV damage for smoother, more supple skin

SELECT THE SOLUTION THATS RIGHT FOR YOU

CHOOSE FROM OUR **TWO CUSTOMIZED FORMULATIONS:**
HYLA3D™ FACE SERUM & HYLA3D™ FACE CREAM

Hyla3D™ FACE SERUM

Hyaluronic Acid Complex

A patented combination of advanced technologies enhances hyaluronic acid in 5 different ways plus additional skin and HA boosting technologies to help revitalize and restore the skin's hydration, and youthful volume!

CUSTOMIZED SERUM INGREDIENTS:

TISSUE RESPIRATORY FACTOR

Enhances fibroblast activity for enhanced HA synthesis, reduced irritation and more rapid recovery for smoother, more resilient skin

CALCIUM KETOGLUCONATE (HA BOOSTER)

Increases HA synthesis to increase hydration and elasticity

CoQ10

A potent antioxidant to help protect HA in the skin

plus

PATENTED HYLA3D™ TECHNOLOGIES:

LIPOSOMAL ENCAPSULATED HA

Enhances penetration of large molecular weight HA deep into the skin to hydrate and soothe

CROSS-LINKED HA

A time-release, cross-linked HA with 50X more water binding capacity and 5X more water retention after 24 hours for consistent, long-term hydration

ULTRA-LOW MOLECULAR WEIGHT HA

Superior water retention and immediate hydration of the surface of the skin

OLIGOPEPTIDE-24 (HA PEPTIDE)

A peptide shown to increase fibroblast activity, increase synthesis of HA and elastin, reduce inflammation and decrease UV damage for smoother, more supple skin

Hyla3D™ FACE CREAM

Hyaluronic Acid Complex

A patented combination of advanced technologies enhances hyaluronic acid in 5 different ways plus advanced barrier function support technologies help to restore skin's hydration, ability to retain moisture, and boost youthful volume!

CUSTOMIZED CREAM INGREDIENTS:

ACQUACELL®

Boost skin's barrier function and moisture retention

TOCOTRIENOL

A form of Vitamin E to assist with barrier function and protect against environmental conditions

NON-STAINING TURMERIC

Powerful anti-inflammatory that improves overall skin quality

plus
