

# COMBAT AGEING SKIN

Fine lines, wrinkles and uneven skin texture are commonly assumed to be an inevitable result of aging. This belief, however, is not accurate. Most of these changes are caused by a loss of collagen and elastin in the skin due to cumulative sun exposure and environmental damage. In fact, 90-95% of perceived aging is due to sun exposure. Coupled with a decrease in cellular turnover with age, the result is dull, lax, and wrinkled skin.

*transform your skin...*

SKIN RESEARCH®

## KEY CAUSES OF VISIBLE SIGNS OF AGEING:

LOSS OF COLLAGEN

SUN DAMAGE

LOSS OF ELASTIN

DID YOU KNOW?

By the time someone is in their 60-70's, they have

**LOST AS MUCH AS 40-50%  
OF THE COLLAGEN IN  
THEIR DERMIS,**

resulting in lost strength, volume and wrinkles.

## THE KEY TO ADDRESSING AGEING SKIN

is to **RESURFACE THE SKIN** with key ingredients like retinol and multiple targeted acids and **REJUVENATE THE SKIN** with advanced ingredients like growth factors, hyaluronic acid, cycloastragenol and antioxidants.

Pairing skincare along with **SKIN TEXTURE TREATMENTS** for additional resurfacing to dramatically improve the appearance of texture, fine lines and wrinkles and **MINIMISE OR PREVENT** additional future damage.

## KEY INGREDIENTS TO COMBAT AGEING SKIN

### SKIN RESURFACING ACIDS

Exfoliating your skin with resurfacing technologies including Alpha Hydroxy Acids (AHAs) like glycolic acid, Beta Hydroxy Acids (BHAs) like salicylic acid have been shown to assist the cellular turnover process by removing dry skin cells, helping to thin out the upper layer of skin as well as support production of new collagen and elastin. Glycolic Acid can also hydrate the skin and enhance collagen and elastin production to create more volume.

### RETINOIDS

Retinoids, like all-trans-retinol, stimulate collagen production and thicken the dermis to reduce the appearance of wrinkles but not all retinoids are created equally. The type of retinoid, the concentration and the manufacturing process directly affect the efficacy and result of the final product.

### VITAMIN C

Vitamin C is essential for multiple reasons! It is a powerful antioxidant that helps prevent environmental ageing in the skin, predominantly caused by sun exposure. The skin also needs Vitamin C to continually make collagen, to maintain firmness and for overall growth and repair for skin health.

### PEPTIDES & GROWTH FACTORS

Peptides & Growth Factors serve as building blocks for collagen and elastin in the skin. They react to specific receptor sites so they can trigger and signal more effective skin functioning, helping skin to act in a younger way. They assist in correcting some of the cellular behavior that has occurred as a result of aging and therefore help with the skin's healing and repair to rebuild collagen & elastin to improve skin's overall quality including the skin's texture and elasticity.

## PRODUCTS DESIGNED TO PREVENT AGEING SKIN

### AGE INTERVENTION® RETINOL PLUS

Reduce the appearance of wrinkles with this advanced solution combining retinol, peptides and antioxidants. Awarded Best Retinol Cream two times by NewBeauty Magazine!

- All-Trans-Retinol
- Anti-Aging Peptides
- Green Tea Extract
- Chrysin
- Bisabolol
- NHS (N-Hydroxysuccinimide)
- Hyaluronic Acid
- Shea Butter

#### Clinical Study Summary:

- 97% of subjects noted improvement in skin smoothness, luminosity, texture and pore size
- 93% of subjects noted improvement in skin elasticity & the appearance of fine lines & wrinkles
- 97% of subjects noticed improvement in overall skin quality

**COMBINE** Age Intervention Retinol Plus with The Skin Care Management System for **BEST RESULTS!**

### RETINOL PLUS FACE MASK

An advanced at-home retinol mask that helps reduce the appearance of fine lines and wrinkles, sun damage, and hyperpigmentation for visibly smoother more radiant looking skin.

### SKIN CARE MANAGEMENT SYSTEM™

The **MOST AWARDED PRODUCT** by NewBeauty Magazine and 2022's Best System!

A comprehensive collection of advanced products delivers rapid improvement in the appearance of fine lines & wrinkles, uneven texture and sun damage.

- Peptides, growth factors
- Vitamin C
- AHA & BHA resurfacing acids
- Hydrators
- Broad-spectrum Sunscreen

*"The winningest product in NewBeauty Award history, Skin Care Management System features five essential topicals to whip lackluster skin into shape, and is great for beginners and novices alike (it's also a celeb favorite)."*  
- NewBeauty Magazine

- All-Trans Retinol
- Vitamin E
- Oligopeptide-24
- Ceramide
- Salicylic Acid
- Squalane
- Aloe
- Hyaluronic Acid
- Alpha Bisabolol
- Shea Butter
- Green Tea Extract
- Essential Fatty Acids

### REGENERATION BOOSTER

This patented formulation hydrates skin, reduces the appearance of fine lines and improves the appearance of texture and overall skin tone.

- Cycloastragenol
- Transforming Growth Factor beta 1
- Keratinocyte Growth Factor
- Epidermal Growth Factor
- Anti-Aging Peptides
- Green Tea Extract
- CoEnzyme Q10
- Hyaluronic Acid
- Essential Fatty Acids

#### Clinical Study Summary:

- 100% of subjects noted improvement in overall skin quality with statistically significant improvement after just two weeks
- 100% of subjects noted improvement in at least 3 or more categories with an average improvement in 6.7 of 8 categories including: wrinkles, texture, pore size, elasticity, skin color/clarity, erythema, hydration and overall skin quality
- 100% of subjects noted positive user experience

### IN-OFFICE TREATMENTS

A wide range of treatment options are available to help achieve best results. Work with your provider to create a customized treatment plan to address your specific concerns.
