

DYNAMIC INFUSION. ACCELERATED RESULTS.

Customised Skintrinsiq™ treatment protocols can enhance clarity, brightness, and bounce while minimising the appearance of fine lines, wrinkles, and skin discoloration.

With no downtime, targeted Skintrinsiq treatments give skin exactly what it needs, when and where it is needed.

Talk to your skincare expert about which treatment will help you meet your skincare goals.

NOT JUST ANOTHER DEVICE

AN OBAGI® DEVICE

Obagi harnesses the power of science and innovative technology to promote skin health. We've taken our expansive knowledge from being a leader in the medical skincare market for over 30 years and have used it to create the Skintrinsiq device, a catalyst for healthy skin.

Antioxidant:

Refresh and revitalise skin

Brightening:

Reveal a smoother, more radiant complexion

Clarifying:

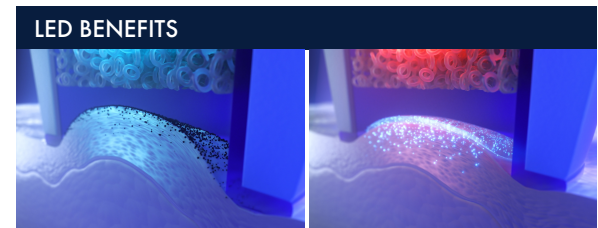

Improve oily, blemish-prone skin

Firming:

Rejuvenate skin while minimising the appearance of fine lines and wrinkles

Choice of Blue and/or Red LED Light Therapy
Administered Simultaneously with Extraction and Infusion

BLUE LED LIGHT

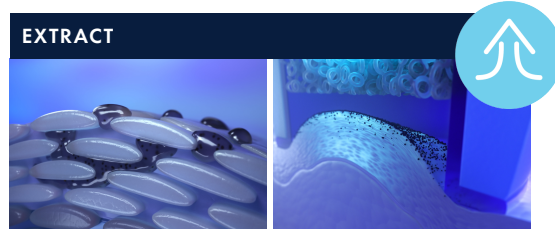

- Suitable for acne-prone skin¹
- Reduces blemish-promoting surface bacteria²
- Improves the appearance of oily skin and congested pores³

RED LED LIGHT

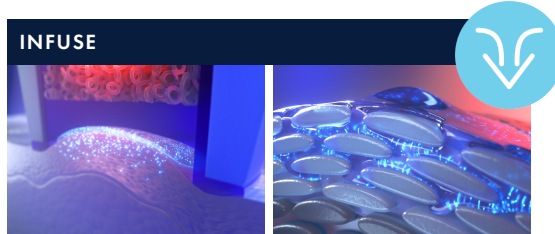

- Helps skin look smoother and plumper^{4,5}
- Reduces the appearance of superficial redness⁶
- Helps finish and lock in the benefits of Skintrinsiq treatment protocols

INNOVATIVE TECHNOLOGY REACH A NEW LEVEL OF SKINCARE RESULTS

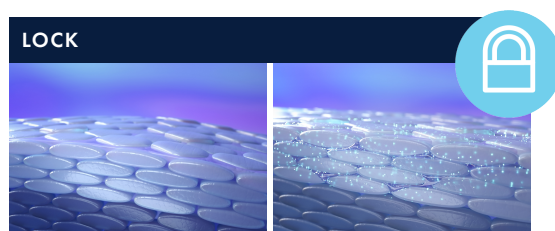

Guided by our deep understanding of skin structure, innovative technology opens channels within the stratum corneum for multi-action benefits.

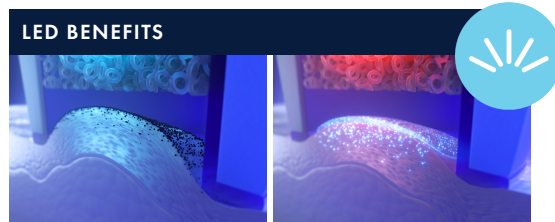

Built-up impurities are removed from the skin's surface.

Proven Obagi products are rapidly distributed to absorb into the skin.

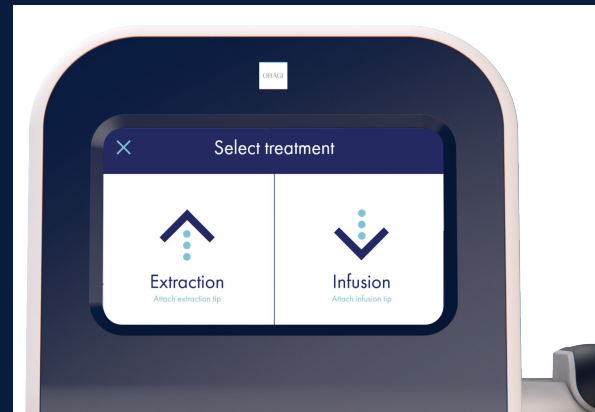

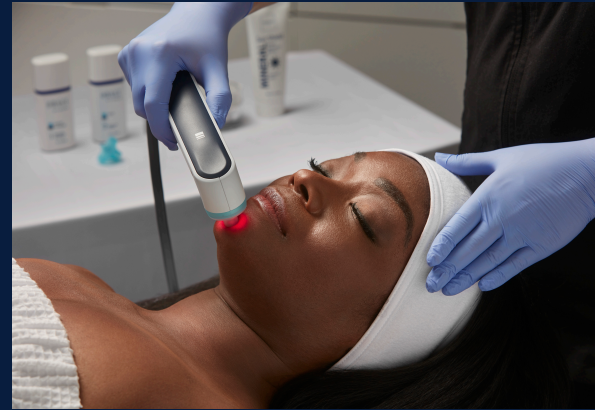

Once infusion is complete, product remains in the skin to continue working after the treatment.

The SkintrinsiQ device has the unique ability to integrate both blue and red LED light without additional treatment time.

MADE FOR EACH OTHER MADE FOR YOU

Accelerate the results of your Obagi skincare routine with an innovative treatment
