

≡ SKINTRINSIQ™  
PROTOCOLS

## CONSIDERATIONS: Recommendation wait times

The Skintrinsiq Antioxidant Treatment is intended for clients with visible damage who are interested in taking the first step to fortify the skin's natural defenses against future environmental assaults. This antioxidant treatment is perfect for those with photodamage.

5 DAYS	Exfoliants, tretinoin, or salicylic acid
10 DAYS	Facial waxing, laser hair removal, or electrolysis
14 DAYS	Injectables, chemical peel, microneedling, microblading
4 WKS	IPL / photofacial
3 MTHS	Laser treatment / cosmetic surgery
6 MTHS	Accutane, chemotherapy, radiation

This facial is intended for use with Obagi Medical Products only and should not be combined with any other products. Protocols and recommended products are suggestions to be used at the discretion of the medical professional performing the procedure. Results are not guaranteed.

## FACIAL procedure
