

Why patients choose ULTRAcel:

ULTRAcel delivers non surgical skin tightening and lifting as well as addressing fine lines and wrinkles.

The result is fresh and smooth looking skin.

In addition to being safe and clinically proven, the HIFU treatment can be delivered in under 10 minutes making it one of the fastest non-invasive full face lift treatments available.

Frequently asked questions:

When will I see results?

The skin will begin to feel smoother, tighter and lifted immediately after the first treatment. Results from the treatment will continue to improve for up to six months, increasing with additional treatments.

How many treatments will I need?

Your consultant will discuss your bespoke treatment pathway, however most patients take between 1-3 treatments.

What aftercare routine should I follow?

It is recommended to use a medically proven skin care regime such as Obagi Medical Products.

How long before I can return to normal activities?

Most patients are able to return to their normal routine straight away.

ULTRAcel is a mini face lift you can have done in your lunch break. My skin was firmer and lines softer. And the best bit? It encourages collagen to regenerate so you will see new results for months to come

Triple-layered non surgical skin tightening technology

ULTRAcel is a revolutionary, no downtime, TFL (Triple Face Lifting) technology.

1

Micro-Needling with RF
Tighten, tone and rejuvenate the skin

2

Surface Radio Frequency
Promotes natural collagen growth to the skins surface through thermal energy

3

HIFU
Precisely targeted thermal energy tightens and contracts muscular layer

These three techniques combine to lift not just the skin, but the deep muscle layer underneath, which was previously only reached by surgical facelifts. Together they create the ultimate non-surgical face lifting technology:

The ULTRA-Lift

Treatment areas

1 2 Brow lift

1 Eye lift
Eye rejuvenation

3 Mid face skin
tightening & lifting

1 Lip treatment
(Fine lines & wrinkles)
