INTRAcel™

Non-surgical skin tightening and resurfacing

Super Natural Beauty

INTRAcel - Non-surgical skin tightening and resurfacing

INTRAcel is an innovative, proven technology producing reliable results, reducing the signs of ageing, eliminating wrinkles and correcting scarring with little or no downtime, allowing you to resume your daily life quickly.

What can INTRAcel do for me?

INTRAcel treatments can improve the texture of your skin. It will minimise signs of ageing including sagging, fine lines and deep wrinkles. Also proven effective in treating acne, acne scars, scars, large pores and stretch marks.

INTRAcel can:

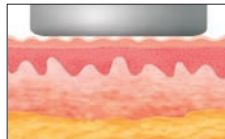

- Improve the texture of the skin to produce a smoother and younger appearance
- Reduce sagging, fine lines and wrinkles by tightening the skin
- Diminish large pores stretch marks
- Treat acne, acne scars and scars rendering them less visible on the skin

INTRAcel is a revolutionary treatment using tiny insulated micro-needles which, unlike laser procedures or surgery, protects the surface of the skin from damage.

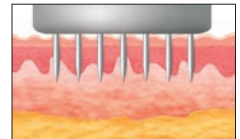

Treatments are targeted at variable depths below the skin surface, meaning that healthy skin is left undamaged causing minimal pain and discomfort.

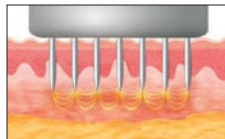

The handpiece is placed on the skin

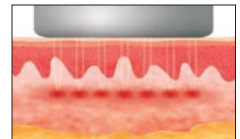

The RF Microneedles painlessly penetrate

RF energy is targeted to the area

The RF Microneedles retract and the regeneration process begins

“I am really starting to see a difference – thanks so very much for what you have done so far... ..in case I don't thank you enough in person.”

Jayne, age 40 - Acne scarring

“Just to say thank you so much. The INTRAcel treatment achieved results way beyond my expectations. My skin has improved dramatically and looks absolutely amazing, can't wait to see the results from a second treatment.”

Fiona, age 45 - Facial palsy

Frequently asked questions

How long before I can return to my normal activities?

Immediately resume normal activities, full skin recovery is between 1-6 days.

What aftercare routine should I follow?

It is recommended to use a medically proven skincare regime such as Obagi. Always use a sunscreen (SPF30) to avoid sun damage.

What side effects can I expect after the treatment and how long will they last?

Side effects are rare, have a chat with your doctor if you have any concerns.

Is this treatment suitable for me?

This treatment may not be suitable if you are pregnant, use anticoagulant drugs, have keloid constitution, skin infections, bleeding disorders, pacemaker or skin malignancy. Your doctor should advise you.

How many treatments will I need?

Treatments will be specific to you, normally 1 to 3 INTRAcels are required, please ask your doctor.

“This is the future of non-surgical skin tightening. The results are truly stunning”

Dr John Curran
